

As we all work together to take the necessary precautions during this pandemic, CoventBridge was built for moments like these. For many years we have invested in virtual investigative tools that are now allowing us to provide you with continued support during these trying times. As outdoor activities becomes a daily habit for some claimants during quarantine, these tools are supporting our surveillance efforts as well.

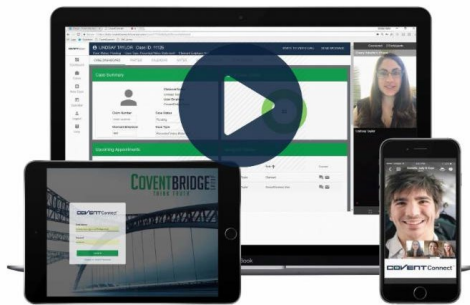

CoventBridge is open in all states for surveillance, field investigations, and desktop investigations. There may be opportunities for you to utilize our virtual investigative products:

- Inview1440 – Remote Surveillance
- CoventConnect – Virtual Interviews, Statements, Crash Scene Investigations & More

For more details on our virtual investigative tools please see below. If you have any questions about surveillance or any of our virtual investigative tools please email: Marketing@CoventBridge.com

Virtual Investigative Tools:

CoventConnect Example Video Below:

CoventConnect *Virtual Interviews & Statements*

We would like to remind our clients that CoventBridge offers a product, CoventConnect, which provides a solution to traditional in-person interviews. This virtual video solution will allow interviews to be conducted and evidence to be obtained all while minimizing the risk of Coronavirus contact to you, your claimants and insureds, as well as our investigators. Rest assured these interviews are completed with highly skilled and licensed investigators, often the same investigator who would have completed the assignment in-person. We understand that our clients' needs to investigate claims will not cease during this high-risk time and we believe CoventConnect is a viable option that will meet your needs while minimizing risk.

InView1440

Unmanned Surveillance

InView1440, our unmanned surveillance, has the capability of day and night video capture and is effective in monitoring a specific site for 24/7 consecutive days, establishing patterns and achieving unbiased monitoring. As the use of remote surveillance is proving successful as claimants are active outside during quarantine mandates, it is important to utilize a trusted partner that combines legal piece of mind, technology, investigative expertise and procedures to meet your needs.
